

USF Summer Studio in Japan - Architecture June 2- July 8, 2009

The Summer Studio in Japan will give students the opportunity to study one of the world's most important architectural traditions and unique cultures. Japanese Architecture evolved over centuries from a combination of foreign and domestic influences into a tradition that is uniquely Japanese. Today Japan continues to be on the cutting edge of architectural design and technology and many contemporary Japanese architects are recognized as leaders in the field. The program will take place in Kyoto, the Kansai region, and Tokyo giving students exposure to a variety of Modern and Traditional building types and their gardens and landscapes. Ample time will be given at each site for students to reflect, write journals, sketch and take photographs.

Eligibility

The program is open to all students in the USF School of Architecture and Community Design who have completed the following coursework; Arc 5363 (Design III), Arc 5588 (Structures II), Arc 5467 (Materials and Methods). Some knowledge of the Japanese language will enrich the experience abroad but is not required.

Please see our website for additional program and course information, application, directions, forms, payment deadlines and other details www.global.usf.edu/educationabroad.
